

MS Windows apps in .NET (code: C#-APP)

Overview

Advanced knowledge of .NET technology allows for creation of fast, secure and complex business applications with unlimited purposes. A good proof of that is the fact that a lot of such applications are currently written in .NET.

This course focuses on creation of applications based on Windows Forms. At the end this course participants will be able to create a whole CRUD (Create Read Update Delete) application using Windows Forms Library and a database. Thousands of such applications are created by companies across the world.
